

libmad 已经安装

/xydzz/madplayer/include

/xydzz/madplayer/lib

同样把 MPlayer-1.1.1.tar.xz 拷贝到/xydzz/madplayer/解压跳转到解压目录

```
# tar xvf MPlayer-1.1.1.tar.xz
```

```
# cd MPlayer-1.1.1
```

```
# mkdir tmp
```

```
./configure --prefix=/xydzz/mplayer/MPlayer-1.1.1/tmp --cc=arm-linux-gcc
```

```
--host-cc=gcc --target=arm-linux --enable-cross-compile --enable-mad --disable-mp3lib
```

```
--disable-gui --disable-menu --disable-gtk1 --disable-x11 --yasm="" 2>&1 | tee logfile
```

```
# make
```

```
// make install 错误
```

去除: config.mak 当中的 INSTALLSTRIP = -s 的 -s

```
# make install
```

安装完毕后看最后一行, 到指定的目录把 mplayer 拷贝到/xyd/rootfs/bin

开发板执行

```
# mplayer fengchuimailang.mp4
```

```
ls
```

```
/opt/FriendlyARM/toolschain/4.5.1/arm-none-linux-gnueabi/sys-root/usr/lib/libncurs
```

```
es.so.5
```

```
# cp /opt/FriendlyARM/toolschain/4.5.1/arm-none-linux-gnueabi/sys-root/usr/lib/*
```

```
/xydzz/rootfs/lib
```

```
// 闪屏
```

```
# mplayer fengchuimailang.mp4 -zoom -x 800 -y 480
```

```
// 没声音
```

```
# mplayer fengchuimailang.mp4 -zoom -x 800 -y 480 -ac mad
```

```
// 声卡驱动
```

```
[root@XYD /madplayer]# insmod snd-soc-wm8960.ko
```

```
[root@XYD /madplayer]# insmod snd-soc-tiny4412-wm8960.ko
```

```
[root@XYD /madplayer]# ./fa_codec_ctrl mini210
```

```
# mplayer fengchuimailang.mp4 -zoom -x 800 -y 480 -ac mad
```
